Dear Ms. Hamalian,

RECEIVED OCT 15 1986

This letter is to invite you to an initial planning meeting regarding the education of midwives in Québec. It will be held in the downstairs lounge at the Simone de Beauvoir Institute on Wednesday, November 5 from 12:30 until 2 pm, and will be a brown-bag, bring-your-lunch meeting.

We have decided to arrange this first get-together to talk about forming a midwifery education program for several reasons:

-The Ministère de la Santé et des Services Sociales is very interested in the implementation of midwifery into the Québec health care system, and, as you know, presently has a Comité Sage-femme working on a report for them. This report will be submitted in November. The Ministère will then be looking at proposals for a phase-in program which will involve inter-university cooperation.

-It is our understanding that Concordia has the mechanisms in place to coordinate the specific courses for such a program from the necessary universities and clinical settings. Perhaps such a program could be created under Women's Studies or the Health Sciences.

-In September the M.S.S.S. invited Dr. Marsden Wagner, of the World Health Organisation to Montreal and Québec City, to ask his advice regarding midwifery care and health care systems. Dr. Wagner encouraged the establishment of a pilot training project - and also that any such training project be set up before legislation is passed. Dr. Wagner will be back in Montreal in late November where he will be speaking at McGill University.

-The Alliance has not only been providing continuing education programs for its members, but has been studying curriculums and possibilities for future training programs in a university setting. One of the ideas that the Alliance is proposing seems to be in keeping with policies of midwifery associations across Canada - that of a phase-in program. Although there is no official word yet, both the Comité Sage-femme of Québec and the Ontario legislature seem to be devising a phase-in system of education. Included here is a resume of the proposal of the Alliance for this system.

Richard Schmidt, of the Department of Education, has suggested that you might possibly be interested in this preliminary stage of a brain-storming session, where possibilities and commitments can be discussed. I believe that you have had some previous information about midwifery in Québec, most probably from Jennifer Stonier, of the Comité Sage-Femme. Jennifer will be present at the November 5 meeting to answer questions, as well as to bring us up to date on the developments of the dossier at the Ministry.

We are hoping to gather people who are interested in helping us to create a midwifery education program, and do hope that you will be joining us in this exciting and historical undertaking. Could you please call me at 288-1848 to confirm your attendance at our November 5 meeting? I look forward to it and to meeting you.

Sincerely yours,

June Etta Chenard

September 19, 1986

Dear Professor Verthuy,

I'm writing to you at the suggestion of Ms. Lysiane Gagnon, who visited us last week. She recommended you for me to contact.

I'm working as a researcher in a Canadian Studies Center, where the Secretariate of the Association for Canadian Studies in China is located. As a woman, I am particularly interested in women's studies and have written an article on Canadian women's movement, more probably will follow.

Women's studies is quite a new subject in China and we are trying to make a good start. At present, what my colleagues and myself have planned to do is, first of all, to make a wide range of study of Canadian women and introduce them to Chinese women by writing articles about their life and work, etc. Secondly, we hope to translate and publish a series of books on Feminism written by western feminists. We believe that by doing so we could give Chinese women a better understanding of the women in a

quite different society. Thirdly, we want to do researches in Chinese women, too, particularly in their relationships to Chinese society and Chinese culture.

We feel that exchanges of views and information between us is of great necessity and your suggestions would be very valuable. We would be extremely grateful if you would send us books on Feminism and information about women's studies programs both in your department and in Canada.

I'm looking forward to hearing from you.

Yours sincerely,

Li Xianping
